

Results CRM SmartVault Integration

Document Management for Results & QuickBooks Users

Results SmartVault Integration provides Results CRM users with an innovative and effective in-the-cloud document management solution. Using this tool, users can scan, upload, and attach documents to any Results CRM record. Results users can access the attached documents from within Results or directly from SmartVault's custom-branded Web Portal. This integration leverages Results' and SmartVault's renowned bi-directional integration with QuickBooks to deliver the ultimate 3-way document management solution for Results CRM, SmartVault and QuickBooks users. The Results SmartVault Integration is included in all versions of Results.

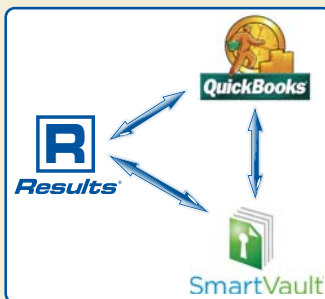

How SmartVault Integrates with Results? 1+1=3

With SmartVault's seamless plug-ins for QuickBooks and Results CRM, users get a powerful 3-in-1 solution for customer relationship management (CRM), accounting, and document management.

With Results + SmartVault + QuickBooks you can:

- SmartVault documents can be added by any user to any record in either Results or QuickBooks
- After a Results QBI Sync, the documents will continue to be available in both systems, without duplicating storage, regardless of what system they were added in

Why Results SmartVault Integration?

Gain full visibility of data across the organization and a seamless experience for scanning, viewing, and accessing documents.

With Results & SmartVault:

- Scan & attach documents to any Results record
- Attach & view documents at the company or record-levels
- Access documents from within Results or from SmartVault
- Access documents at anytime from anywhere via Web Portal

Results CRM integrates with the products that you use every day!
