Aplos Software

Aplos Software

Website: *http://www.aplossoftware.com*

Category

For Nonprofits and Churches

Best Fit

- Nonprofits with a volunteer responsible for bookkeeping
- Bookkeepers who audit nonprofits or churches
- Organizations that need true fund accounting

Strengths

It costs nothing to install and is easy-to-use; you can try it for free.

Enter data in a check register that is just like your checkbook. Get data out with a simple, customizable report section.

There are multiple logins with varying permissions to distribute your accounting work.

It possesses internal control features like the ability to add an auditor as well as an activity log.

Aplos is based on an app model – you only pay for the functionality you use. Add functionality by turning on apps as your organization's accounting needs grow. Examples of apps are Contributions Management, People Database, Check Printing, and Bank Reconciliation. See our growing list of apps at https://www.aplossoftware.com/store/apps.

Brief Product Description and Pricing

The Aplos base product starts with only 5 buttons arranged in 3 rows (Set Up, Enter Transactions, People & Reports). After setting up an organization and chart of accounts, most customers spend the majority of their time entering transactions in the Check Register. This simple base product begins at only $11.99/month for a single user. An

average size nonprofit with all of the apps turned on would still be paying under $30.00/month for all of that functionality. Everyone can try Aplos free for 15 days. Recently founded nonprofits or churches can contact us for extended free trial offers at https://www.aplossoftware.com/contact.

Technical Specifications

Aplos Software is a cloud-based Internet solution. It doesn't matter if you are using a PC or a MAC as long as you have an Internet connection.

Company History and Contact Information

An Aplos founder searched extensively and unsuccessfully for simple accounting software for his own nonprofit. Most accounting software did far more than he needed and was not designed specifically for nonprofits which require fund accounting. In 2009, Aplos Software was founded to create easy-to-use fund accounting software. The name Aplos comes from the Greek word for simple. When the first desktop version was released, initial customer response was excellent. Customers enjoyed the simplicity and finally had the software solution their nonprofit needed. Based on customer feedback, Aplos began development of a web-based solution with a multiple user option. The web-based version of Aplos was released during the 1st quarter of 2011.
