Exact - JobBOSS

Exact JobBOSS

Website: http://www.exactamerica.com/software-and-services/software/exact-jobboss

Category

Small to mid-sized made-to-order or contract job shop solution

Best Fit

Medium SMB to Enterprise Made-to-Order and Contract Job Shop looking to automate workflow processes and backoffice accounting

Strengths

- Flexible scheduling helps you determine promise dates quickly and painlessly, giving you the ability to make commitments on which your customers can rely.
- Automated manual processes compress lead times and expedite cash flow, driving efficiencies directly to the bottom line.
- Waste is eliminated with lean processes and fully utilized resources, whether machines or people.
- This product uses the CRM tools you need to keep customers loyal and competition at bay.

Brief Product Description and Pricing

The JobBOSS Starter Edition starts at $995 and is the easiest way to quote jobs, track labor and material, and control shipping, invoicing, and job-costing processes. The Starter Edition is designed to be simple enough to order on-line and to install with minimal technical support. If more help is needed, JobBoss offers a 12-month customer service plan. This entry level edition may be installed on a single workstation.

JobBOSS Professional Edition allows you to manage customer changes on the fly with integrated quoting, order tracking, scheduling, and accounting capabilities. Now when a customer is on the phone demanding to know if you can still deliver his order on time (even though he's changed the quantity twice), Exact JobBOSS Professional Edition can give you the answer. This is a higher-level product that is intended to be multi-user server-based and requires SQL database for larger data files. Advanced Scheduling offers an easy-to-use, drag-and-drop scheduling board that does what-if scenarios, finite load leveling, and changing of resources/schedule hours on the fly. The ShopBOSS module helps you spot problems, so you can meet your delivery dates. See your entire shop at a glance to focus on key work centers and critical time frames and drill into the details of your schedule by job, work center, part number, or customer. For more detailed understanding of the Professional edition, visit its web site.

The JobBOSS Enterprise Edition is a highly sophisticated solution that takes job shop management to a completely new level. It starts with full data collection, advanced scheduling, material planning, and sophisticated quoting, mixing in more in-depth reporting and costing features and integrating everything with CRM, automated workflow, a wide range of advanced quality management offerings, and the ability to collaborate seamlessly with business partners. Exact JobBOSS Enterprise is available for implementation directly from Exact.

Technical Specifications

Exact JobBOSS is designed to run in a Client/Server environment. However, it may be implemented on-premise in a traditional setup, as a Private Cloud implementation, or as a Hosted Cloud solution depending on your needs.

JobBoss is designed to work best with Microsoft SQL and Windows Server 2003 or later. The application and services may be run in a Virtualized environment. Microsoft Windows 7 or later is recommended for workstations.

Integration with Accounting and Ease of Setup

Exact JobBoss is an advanced fully deployable accounting and financial management software solution. It should be installed by a trained and certified technician.

Exact Software partner Heartland Computers helps you take full advantage of your software investment with a wide range of data collection hardware including barcode equipment, mobile computers, label printers, and wireless networking from all major manufacturers.

Company History and Contact Information

In 1984, a few students in a garage with an entrepreneurial spirit worked together to achieve an ambitious goal: to serve the entrepreneurial world with information technology. From the introduction of the PC through the constantly emerging technologies to handheld devices and perpetual connectivity in the cloud, Exact continued to be entrepreneurs serving entrepreneurs. Exact has been listed on the NYSE Euronext Amsterdam since June 1999. After a quarter of a century of being Exact, the entrepreneurial spirit still reflects those late nights in a garage. Today, Exact is a global solution provider serving approximately 100,000 customers.

In the mid-1990's, when people were using PCs every day, at work and at home, they happily welcomed Windows to make work and life easier. That's when Exact clearly became a market leader in the Netherlands and began looking globally for more customers. On the brink of a new millennium, Exact went public and enlarged its international footprint with acquisitions throughout Europe and in the US. Around this time, Exact launched Exact Synergy. As Web 2.0 became the standard computing model Exact launched Exact Online and business revenue passed the €250 million mark. Exact continues to brand itself worldwide and through its acquisition of Macola and has a respected reputation in North America for such market niches as Manufacturing and Distribution.
