Sage ERP X3

Website: [www.sageerp3.us](http://www.sageerp3.us) and [www.sagenorthamerica.com](http://www.sagenorthamerica.com)

## Category

Designed for mid-sized companies, Sage ERP X3 provides comprehensive functionality encompassing all business processes (finance, sales, CRM, purchasing, warehousing, and manufacturing), core multi-legislative functionality to support international operations, and leading edge technology with the proprietary SAFE X3 platform.

## Best Fit

- Companies with 50-2500 employees
- 10 to 1500+ concurrent users
- Advanced Financials
- Wholesale Distribution
- Manufacturing (Process, Discrete, and Mixed Mode)

## Strengths

- Strong Financials and consolidation features
- Strong solution for users with need for international integration
- Relatively fast and simple integration for decentralized and international units

## Brief Product Description and Pricing

Sage ERP X3 is different from many of today's mature offerings because it combines all the advantages of ERP performance while maintaining simplicity, flexibility, and scalability in a fully integrated, cost-effective end-to-end solution. With Sage ERP X3, you can integrate all your management processes into a single, coherent information system and share all information now required for operations management in real time - companywide. Sage ERP X3 excels at managing increasing volumes of information in less time and requiring fewer resources. The Sage ERP X3 system organizes all internal flows while monitoring exchanges with all your external partners, including customers, suppliers, and contractors.

Sage ERP X3 enables you to operate certain company procedures under comprehensive electronic control, ensuring that this information is processed rapidly and under tight control.

The Sage ERP X3 workflow system makes it possible to activate information, alert, and validation circuits on the occurrence of any system event and according to a large number of control processes criteria. For example, when a new purchase order is entered in the system, you can instruct Sage ERP X3 to automatically notify the purchaser immediately according to the nature of the order, alert a manager automatically if the order exceeds a given amount, and prohibit continuation of the order process without validation when necessary. You simplify and secure all your various activities in this manner.

Sage ERP X3 is sold directly from Sage and through channel partners and must be installed by a certified installer. Pricing varies by number of user licenses. All Microsoft SQL and Oracle Server, Windows OS and Client Access License costs apply.

## Technical Specifications

Windows Vista workstation or higher, Microsoft SQL or Oracle Server

Internet connectivity necessary as well as a high-level knowledge of .NET platform, SQL Query building

Visual Studio a help

## Integration with Accounting and Ease of Setup

Sage ERP X3 operates, as required, in Windows-rich client or web mode, on local and extended networks, including in https secure mode or via a dedicated client with portable terminals for decentralized bar-code type import. Sage ERP X3 also integrates publication of web services which can be used for all applications (web sites, mobile solutions for smartphones and tablet computers, and other software packages). It can also invoke external web services.

While setup is relatively easy, a certified installer is advised. Sage will assist the user with conversion from an existing accounting solution and migration of all necessary data.

## Company History and Contact Information

The Sage Group, plc, is a leading supplier of accounting and business management software worldwide. Currently, Sage North America supports more than 3.2 million customers in the U.S. and Canada. Sage applications cover a full range of business requirements including accounting, customer relationship management, contact management, human resources, warehouse management, and specialized industry needs among many others.
